

BHAVESH NAKUM

Senior Software Engineer | Backend Architect | Cloud Data Specialist | Sarjapur Road, Bengaluru, 560035, India | [linkedin.com/in/bhaveshnakum7](https://www.linkedin.com/in/bhaveshnakum7) | bhaveshnakum485@gmail.com | +91-8128573526

PROFESSIONAL SUMMARY

Engineering leader with over 7 years of experience designing high-performance backend systems and cloud-native data pipelines at scale. Proven ability to lead engineering teams, drive architecture decisions, and build mission-critical systems using Java, Spring Boot, Kafka, and Azure. Adept at building real-time platforms that power thousands of users and millions of SKUs. Passionate about engineering excellence, clean code, and solving real business problems through technology.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
 - **Backend:** Spring Boot, REST APIs, Microservices, Apache Kafka, Event-driven Architecture
 - **Big Data & ETL:** Apache Spark, Hive, HDFS, Sqoop, Airflow
 - **Cloud Platforms:** Azure (ADF, Databricks, Synapse, Key Vault), GCP (DataProc, BigQuery, GCS)
 - **Databases:** Azure Cosmos DB, Cassandra, PostgreSQL
 - **DevOps & Tools:** Git, Grafana, CI/CD Pipelines, Jenkins, Agile, JIRA, Monitoring & Alerting
-

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Lead) *Walmart, Bengaluru* | Apr 2025 – Present

- **Team Leadership:** Lead a cross-functional team of 6 engineers to scale Walmart's real-time pricing and anomaly detection platform supporting 20,000+ daily users.
- **System Architecture:** Architected services supporting dynamic repricing of millions of SKUs with sub-second latency and 5K+ pricing updates per second.
- **Scale & Performance:** Led architectural redesign and replatforming of core pricing services; reduced false positives in pricing anomalies by 30% through improved data modeling and filtering logic.
- **Deployment Excellence:** Enabled zero-downtime deployments using blue-green strategy for Kafka-based services and canary deployments for API-based applications.

- **Observability:** Designed and delivered a reusable plug-and-play Micrometer metrics module adopted across teams for consistent application observability and custom alerting in Grafana.
- **Cost Optimization:** Reduced infrastructure cost and improved availability by fine-tuning CPU/memory allocation, enabling autoscaling, and consolidating deployables.
- **Collaboration:** Partner quarterly with product managers and data scientists to define feature roadmaps, prioritize initiatives, and plan cross-functional releases.

Software Developer *Walmart, Bengaluru | Apr 2022 – Mar 2025*

- **Pipeline Engineering:** Built real-time anomaly detection and repricing pipelines, removing 1M+ mispriced items from the catalog.
- **Seller Tools:** Developed pricing automation tools for sellers, reducing manual overhead and improving competitiveness.
- **Reliability:** Enhanced system reliability with full-stack alerting and dashboarding for production-grade observability.

Data Engineer *UnitedHealth Group, Hyderabad | Apr 2021 – Apr 2022*

- **ETL Design:** Designed scalable ETL pipelines using Azure (Data Factory, Databricks, Synapse) to ingest and transform healthcare data.
- **Automation:** Developed PySpark-based transformation logic and modular Airflow DAGs to accelerate pipeline development while ensuring HIPAA compliance.

Systems Engineer *Tata Consultancy Services, Hyderabad | Sep 2018 – Apr 2021*

- **Cloud Migration:** Migrated legacy data warehousing platforms to a Hadoop-based Azure ecosystem for Proximus (Belgium).
- **Optimization:** Rewrote HQL queries to optimize performance and reduce compute costs by 25%.
- **Modernization Tools:** Engineered a tool to convert Teradata SQL to Hive and PySpark scripts using Python and Regex for Bank of America.

ADDITIONAL HIGHLIGHTS

- **Mentorship:** Mentored new hires and junior engineers; participated in hiring and interview panels for vendor and FTE roles.
 - **CI/CD:** Automated CI/CD pipelines by integrating functional, integration, end-to-end, and performance testing into the deployment process.
 - **Engineering Standards:** Passionate about performance optimization and technical documentation for high-concurrency systems.
-

EDUCATION & CERTIFICATIONS

- **B.Tech – Computer Engineering:** SVNIT, Surat | 2018 | **CGPA: 7.18 / 10**
- **Microsoft Certified:** Azure Fundamentals
- **Apache Airflow Fundamentals**
